thehelper [🔗](#)

Full-Stack Developer

Developed a full-stack, two-sided marketplace platform designed to connect individuals requiring immediate assistance with local "helpers." The system streamlines task delegation by providing a seamless interface for posting requests and managing service fulfillment.

Architected the backend using Django to handle complex user roles. Engineered key features including real-time request tracking, a secure chat system, user authentication, a responsive dashboard for task management, an integrated payment gateway, and automated mail support.
